Coming Soon...Guest Speaker

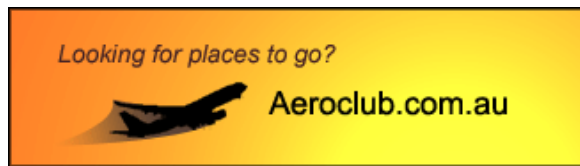

In his 1911-14 expedition to Antarctica, Douglas Mawson took a wingless, single propelled plane with to use as an "air tractor" to haul supplies. On New Years Day 2010 a team of conservationists found parts of Mawson's plane near his huts at Cape Denison.

Tony Stewart will be giving the members a presentation on the Antarctic search for Mawson's aircraft. That is sure to be an enthralling story that is not to be missed. Details to come.
